

I am shocked that the National Board of Broadcasters are trying to limit the content that I am able to listen to on my XM Satellite Radio (petition 04-160). It sounds like the NAB is threatened by the superior quality of programming on XM Radio. Instead of dictating what I am permitted to hear on a service that I pay a monthly subscription for, they should look in to improving the quality of programing on broadcast radio. FM and AM radio are inferior to XM Satellite Radio and that's why I pay a subscription. Until XM Radio became available, I didn't listen to radio of any type anyway. I strongly urge you to reject the NAB's petition to dictate the content that I AM PAYING FOR!
